COMPLETE SPECIFICATION.

Improvement in the Construction of Foot Baths.

I, JAMES ALEXANDER MCKEE late of No. 60 Loudoun Road, Saint John's Wood, but now of No. 28 Alexandra Road, South Hampstead, London, in the County of Middlesex Ironmongers Assistant, do hereby declare the nature of this invention and in what manner the same is to be performed, to be particularly described and ascertained in and by the following statement :—

5

To plan, form and construct, the bottom and interior of foot baths, so as to afford convenient and comfortable steps or places for the feet to rest on and against ; in some such way as is indicated by the part marked A. B in the accompanying drawing or, the said improvement may consist of one or more parts, which may vary in form position and arrangement, while embodying the same principle.

10

The treatment as above stated, is applicable to baths made of tin or other metal, but when they are made of earthenware the improvement can be obtained by shaping the body of the bath.

Having now particularly described and ascertained the nature of my said Invention, and in what manner the same is to be performed, I declare that what I claim is,

15

Improvement in the construction of foot baths, by shaping and planning the bottom and interior,—that is, to near the level of the top—when they are made of tin or other metal, or other suitable material ; and by shaping and planning the bottom and body, when they are made of earthenware ; so as to afford convenient and comfortable steps or places for the feet to rest upon and against.
